

CHUCK TAYLOR ALL STAR SIZING CHART

HOW TO MEASURE FOR SHOES

To determine your child's sneaker size, follow these simple steps:

STEP ONE

Print this page. (when printing, make sure no adjustments are made e.g. expanding/shrinking of page to paper size.) Use a ruler to confirm scale printed accurately.

STEP TWO

Have your child stand up with a heel just touching the line below "place heel here". If the longest toe falls between two sizes, select the larger size. Measure the other foot as well. If one foot is larger than the other, choose the larger size.

STEP THREE

Use the conversion chart below to determine the child's Chuck Taylor All Star size.
